

# MedCompass

## Quality Management Module

- Delivers a flexible, integrated set of tools that optimize the user's quality program.
- Benchmark and improve HEDIS, Stars, and PQA ratings.
- Provides a single source of truth for all care management activity.

### Quality Management for Payers and Providers

#### Reporting & analytics

Reporting and analytics data is based on nationally recognized quality standards and benchmarks. Designed to directly improve HEDIS, STARS, and PQA ratings.

#### Quality & performance

Quality Management not only improves patient quality but increases the performance of the healthcare system.

#### Proactive care

This module is integrated with the Care Management solution to proactively work with patients to close gaps in care.

### Complete Care for the Patient

MedCompass delivers all Care Management functions in one system. Users benefit from a single source of truth to coordinate a patient's care.

The platform brings utility and efficiency by creating a member-centric solution for managing services and procedures.

MedCompass supports both manual and digital authorizations creating a centralized location eliminating the need for other external systems. The configurability streamlines the user's experience and automates unique client workflows, allowing users to optimize resources. Decisions, data, and care are seamlessly coordinated with all clinicians.

### Built for Today and Tomorrow

MedCompass is a highly configurable, population health management platform. While the configuration is adaptable to meet client's needs, there are a series of clinical and user best practices that are implemented through the base configuration product design.

- Based on clinical best practices to optimize performance improvement.
- Provides complete interoperability with most EMR systems.
- Quickly deployed through standard implementation, training, and onboarding.

Improves outcomes, lowers costs, and adheres to standards, such as HEDIS, Stars, and PQA.

---

The primary goal of MedCompass is to protect and secure client data. Embedded with the highest global standards, the HITRUST certification helps to achieve this goal by validating our platform is compliant to those benchmarks.

**HITRUST**  
**CSF Certified**

Population Health Management Prevalidation is designed to help health plans and other organizations identify health IT solutions that alleviate or increase the efficiency of administrative tasks to meet Population Health Management requirements in Health Plan Accreditation.
