

# MedCompass

## Services Management Module

- Schedule services in different ways from general frequency down to a specific hour.
- Community services can be triggered while working directly with the patient.
- Plan and budget the cost of services in real-time.

### Services Management for Payers and Providers

#### Social Determinants of Health

Considers Social Determinants of Health (SDOH) to help Care Managers determine appropriate actions.

#### Community services

Use it to reach community services, Meals on Wheels, Uber/Lyft, protected services and dietary services.

#### Scheduling

Schedule services from general frequency to a specific hour.

#### Budgeting

Plan and budget the cost of services in real-time.

#### Automation

Certain services can be triggered while working with the member directly.

### Complete Care for the Patient

MedCompass delivers all Care Management functions in one system. Users benefit from a single source of truth to coordinate a patient's care.

The platform brings utility and efficiency by creating a member-centric solution for managing services and procedures.

MedCompass supports both manual and digital authorizations creating a centralized location eliminating the need for other external systems. The configurability streamlines the user's experience and automates unique client workflows, allowing users to optimize resources. Decisions, data, and care are seamlessly coordinated with all clinicians.

### Built for Today and Tomorrow

MedCompass is a highly configurable, population health management platform. While the configuration is adaptable to meet client's needs, there are a series of clinical and user best practices that are implemented through the base configuration product design.

- Based on clinical best practices to optimize performance improvement.
- Provides complete interoperability with most EMR systems.
- Quickly deployed through standard implementation, training, and onboarding.

Schedule services based on patient needs with MedCompass' health services management software.

---

The primary goal of MedCompass is to protect and secure client data. Embedded with the highest global standards, the HITRUST certification helps to achieve this goal by validating our platform is compliant to those benchmarks.

**HITRUST**  
**CSF Certified**

Population Health Management Prevalidation is designed to help health plans and other organizations identify health IT solutions that alleviate or increase the efficiency of administrative tasks to meet Population Health Management requirements in Health Plan Accreditation.
