

MedCompass

Innovative, Patient-Centered,
Connected Care Platform

assurecare®

Empowering Value-Based Care with AssureCare's MedCompass Platform

The healthcare ecosystem faces challenges due to its fragmented nature, hindering the effective delivery of healthcare services.

MedCompass, AssureCare's patient-centric population health management solution, elevates healthcare quality and efficiency by providing the data and tools necessary to address key challenges. MedCompass revolutionizes healthcare delivery with key features supporting value-based care and regulatory compliance.

Key features that drive value-based care:

- Comprehensive Care Coordination
- Data Integration and Interoperability
- Patient-Centered Approach
- Quality Measurement and Reporting

A Tailored Solution That Meets Your Unique Needs

Utilization Managers

Utilization Managers can streamline care delivery, optimize resource allocation, and ensure cost efficiency by considering indicators like mortality risk and comorbidities.

Pharmacists

Pharmacists use MedCompass to assess each patient's prescribed medication for effectiveness and safety, considering their health conditions and other medications.

Quality Managers

Quality Managers can construct a comprehensive patient-centric view, enabling precise and targeted interventions to improve patient outcomes.

Care Managers

Care Managers depend on MedCompass to effectively manage patient care throughout the entire healthcare system.

A Powerful Suite of Modules

MedCompass is a comprehensive suite of software modules offering extensive functionality, individually or combined, to enhance your organization's efficiency. Partnering with AssureCare, MedCompass seamlessly integrates with payors, providers, and employers, ensuring holistic healthcare management.

Utilization Management

With a 360-degree view of the patient, the care team can have a single point of contact to identify gaps in care, optimize staff utilization, eliminate unnecessary costs and delays, and visualize the patient's total treatment.

Medication Management

Seamless Medication Management, offering medical billing, a provider portal, telehealth wellness, MTM reporting, medication adherence, and Pharmacogenomics integration.

Care Management

Real-time data and communication are imperative for conducting accurate assessments, pinpointing problems, identifying intervention opportunities, and effectively measuring program impact.

Quality Management

Versatile and comprehensive tools designed to enhance healthcare outcomes, improve adherence, identify gaps in care, and elevate quality ratings such as HEDIS and STAR measures.

MedCompass helps organizations comply with the 21st Century Cures Act by providing secure access to patient health information, meeting regulatory requirements while maintaining patient privacy and security.

Discover how our integrated solutions can transform your operations and elevate patient outcomes. Contact us today to learn more about how AssureCare can meet your unique needs.
