

OptimAlzer

Authorization Decisions In Real-Time Using Artificial Intelligence

assurecare®

Empower Population Health Management with Advanced Artificial Intelligence

The prior authorization process can delay access to care and impede the achievement of quality outcomes. According to the American Medical Association, over 80% of providers experience care delays due to slow authorizations, with more than a third reporting serious adverse events as a result.

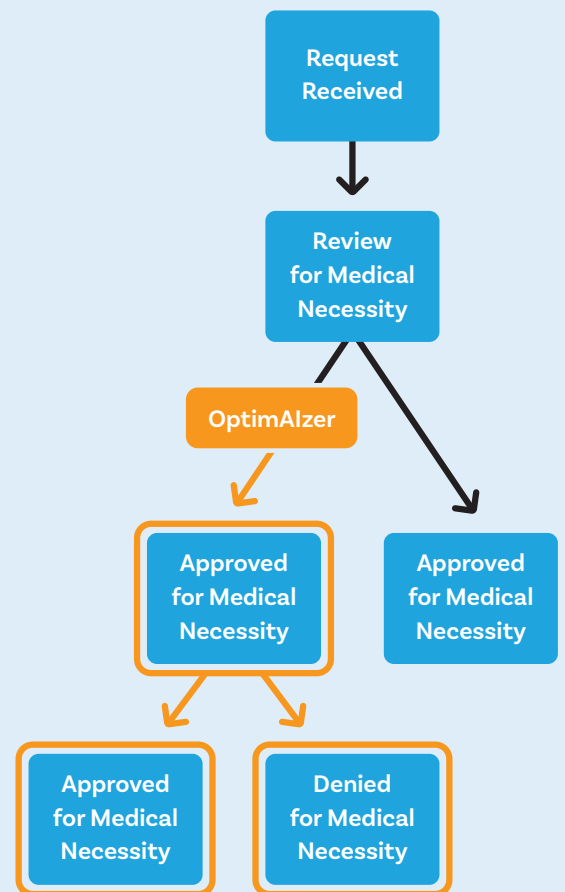

OptimAlzer is AssureCare's cutting-edge AI solution, revolutionizing healthcare decision-making to elevate health outcomes. It offers nearly instant authorization decision recommendations, drastically reducing delays and streamlining decision-making by an impressive 68%.

This solution can be configured to offer recommendations for approval only or both approval and denial, providing flexible decision-making to suit various operational needs with just a click. By automating post-decision reviews, 68% of physician capacity can now be better utilized with OptimAlzer, saving valuable time that can be directed toward member management. It also helps payors improve compliance rates by achieving record turnaround times.

OptimAlzer is proven to save \$3-4 million in physician review time for every 1 million lives, while unlocking the potential to better utilize 68% of physician capacity
